[EN] Greeting and welcome to the ICON Token Swap Manual.

CAUTION: NEVER SHARE YOUR PRIVATE KEYS WITH ANYBODY! Many scammers continue to impersonate ICON admins in order to steal your cryptocurrency. ICON ADMINS WILL NEVER ASK FOR YOUR PRIVATE KEYS. NEVER SHARE YOUR PRIVATE KEYS!

When ICON launched it's ICO and ICX began trading, ICX was an ERC20 token based on the ETH network (an Ethereum blockchain token). ICON has (since 2018) migrated to it's own public blockchain and now uses it's own ICX coin.

The previously used ICX tokens were made by the ICON Foundation and hosted on the ETH network, and the full name of these tokens is ERC20 ICX token. These are no longer the cryptocurrency of the ICON network.

ICON now uses it's own ICX mainnet coin, which is the coin based on ICON's own independent network. We call ICX a (mainnet) coin because it's based on independent network, ICON network.

The old ERC20 ICX tokens are now redundant and are only able to be stored in an ETH wallet, alternatively new mainnet ICX coins are able to be used in the ICON network and stored in an ICX compatible wallet such as ICON's own wallet - ICONex, which is the wallet application where a user can load and/or create themselves a mainnet ICON(ICX) wallet.

An ICON wallet corresponding to an ETH wallet storing ERC20 ICX tokens is made automatically, and an owner of ERC20 ICX tokens can access this corresponding ICON wallet only if the owner knows the PK (private key) of the ETH wallet.

Please be careful; an address begins with 0x- is ETH wallet, but one that begins with hx- is an ICON wallet. Moreover, please differentiate ETH wallet and ICON wallet. ETH wallet is the wallet that stores ERC20 ICX token, but ICON wallet is the wallet for only mainnet ICX coin.

If you are a hard wallet user, like Ledger or Trezor, you should extract the PK of the wallet which exists in the hard wallet and is storing ERC20 ICX tokens. You should contact hard wallet's company regarding extracting the PK. We guess you could find some manuals for extracting the PK on the URLs listed below.

https://support.ledger.com/hc/en-us https://wiki.trezor.io/Recovery_seed https://www.myetherwallet.com/access-my-wallet

- 1. Setting
- Download ICONex from the Chrome Webstore
- Load the ETH wallet that stores your ICX ERC20 tokens

iCCi∩∈x	My Wallet Transfer	Contract My P	age KR · EN
Total Assets © ÷: Coins 1 Tokens 1	1 "Takens that have no USD-co	.018 USD ~ verted prices will not be included.	- 511 80.75 - 52 1935

Example Account			≒ 1.018 usp :
Ethereum	0.0037284	6 ETH = 0.8	USD No withdrawal history Transfer
ICX ERC20	0.3028	9 ICX ≒ 0.1	96 USD No withdrawal history Transfer
		~	

 Request Swap: Send 0 ETH only (NOT ERC20 ICX) from the wallet that stores your ICX ERC20. (If your ETH wallet have an issue in sending 0 ETH, please send a minimum ETH, like 0.000001 ETH)
 Click the 'Transfer' button of your Ethereum address.

\$ Example Account 2			⇒ 0	.989 USD :
Ethereum	0.00372846 ETH	⇒ 0.799 USD	No withdrawal history	Transfer
ICON	0.30289 ICX	⇒ 0.19 USD	No withdrawal history	Transfer
	^			

- Enter 0 ETH as the transfer amount (This is only for the verification. You only have to pay the transaction fee.)

- Enter the ETH address below. This address belongs to the ICON Foundation.

ETH Address: 0x4c35b228dd2027acd4a229cd21c1b33d3a57c509

Transfer Amount	0	ETH 🗸	MAX
	≒ 0 USD	Balance 0.003728462 ETH

(Please make sure you enter the right receiving address.)

3. After the request, ICON Foundation will send the same amount of ICX coins to the verified addresses that store ICX ERC20 tokens.

• The ICX coin will be sent automatically to the ICX wallet that is loaded by the ETH wallet's PK you send 0eth.

4. How to check your swapped ICX

4.1. Save the private key of your ETH address that stores your ICX tokens

- If you store your wallet in ICONex, you can copy the private key from the 'Backup wallet' menu

Wallets Example Acco.	Private Key	Add Wallets + Connect to Ledger
Ethereum ICX ERC20	Please be sure to enter the correct private key for the matching coin type. Next	r Transfer

- New ICX wallet will be created. The private key is the same as ETH address that stores your ICX ERC20 tokens.

(Please take caution managing this ICX wallet as your ICX coins will be sent to this address)

5. Swap Schedule : the 1st of September 2020, 18:00 (KST) sequential processing *(Submission order)

FAQ Sheet : Additional token swap support			
Question	Answer		
When is the deadline for submission of 0 ETH?	by the 1st of September, 2020, 09:00 (KST)		
When will my ERC20 ICX token swap to MainNet ICX coin?	The token swap will begin the 1st of September, 2020, 18:00 (KST), and will be delivered on a first come first serve basis.		
What is the address that I should send 0 ETH to?	0x4c35b228dd2027acd4a229cd21c1b33d3a57c509		
	= ICON Foundation's ETH Wallet address		
Why do I need to send 0 ETH to ICON Foundation?	This is the procedure to check if you are the owner of the wallet you wish to token swap.		
Is it possible to send 0 ETH from a wallet other than ICONex?	It doesn't matter which wallet you use. Please just send 0 ETH to 0x4c35b228dd2027acd4a229cd21c1b33d3a57c509. We will check the balance of ERC20 ICX tokens stored in the sending address.		
Why can I not move ERC20 ICX to another wallet?	All of ERC20 ICX was locked up, so you can not move your tokens. After the end of the formal token swap, all of the ERC20 ICXs have been locked up.		
How will I receive my MainNet ICX?	You can load your ICX wallet from ICONex via the PK of your ETH wallet. We will send MainNet ICX to this wallet address. (* When you load ETH wallet with the private key in ICONex, ICX wallet sharing the same pk with ETH wallet is automatically created!)		
How do I check the PK of a hard wallet (Ledger, Trezor)?	In the hard wallet, the PK can be found through "Mnemonic Phrase" or another method the wallet's company made. Please contact the company regarding further info.		
	Please refer to the URLs below		
	https://support.ledger.com/hc/en-us		
	https://wiki.trezor.io/Recovery seed		
	https://www.myetherwallet.com/access-my-wallet		
	*Access my wallet -> Software -> Mnemonic Phrase		
Can I get a token swap without a PK?	If you do not have a PK, you can not check and withdraw the swapped coin. The swapped coin can only be checked on the ICX wallet loaded through the PK of the ETH wallet that you sent 0 ETH from		

How to load ICX wallet	 Install ICONex on Chrome, IOS or Android. Click 'Load wallet' (or Add wallet then click Load wallet after) Select ICON, not ETH. Input the PK of the ETH wallet where you storing ERC20 ICX tokens. (If the PK begins with 0x, please don't input the PK with 0x at the front) Then the ICON wallet corresponding to the ETH wallet will be created.
* Token swap Process	 Please send 0 ETH from the ETH wallet storing ERC20 ICX tokens to the ICON Foundation's ETH wallet(0x4c35b228dd2027acd4a229cd21c1b33d3a57c509). We check the balance of ERC20 ICX tokens you have, and all of the steps for applying to the token swap is done. We send converted mainnet ICX coins to new ICON wallet that is created automatically. The ICON wallet is corresponding to the ETH wallet storing ERC20 ICX tokens. You can access this ICON wallet where we send converted ICX coins with the PK of ETH wallet storing ERC20 ICX tokens (If the PK begins with 0x, please don't input the PK with 0x at the front). These two wallets are corresponding as explained above. *Please differentiate the ETH wallet and the ICON wallet. A wallet address begins with 0x- is ETH wallet and a one begins with hx- is ICON wallet. Any transaction can't occur between ETH wallet and ICON wallet. *You must input the PK at the step for loading the ICON wallet where we send converted ICX coins. There is no other way to access the ICON wallet or converted mainnet ICX. *We don't send converted ICX to another wallet. *If you are a hard wallet user and the guide we told you is not enough for extracting the PK, please contact the wallet's company.

[KR]

1. Setting

- Chrome Webstore에서 ICONex 설치
- ICX ERC20 토큰을 보유한 ETH 지갑 준비 (개인키 혹은 Keystore 파일로 가져오기)
- ETH지갑에 ICX ERC20 Token이 추가된 상태

(<u>https://docs.google.com/document/d/1kAjICXq2oyT3EYGi3wQMhrarYwGE2kOH5uXkmZYi</u> <u>qRo/edit</u> 에서 11, 12단계 참고)
